VPT EMI Filters Now on Defense Logistics Agency Drawings List

***Military systems designers requiring qualified EMI filters
now have additional, affordable product options***

BLACKSBURG, VA, April 25, 2006 - VPT Inc., the innovative leader in providing power conversion products for military, avionics, space and other high reliability markets, announced that VPT products have been placed on the Defense Logistics Agency Drawing list for MIL-PRF-38534, Hybrid Microcircuit EMI Suppression Filters. This qualification designation enables military designers to procure pre-qualified EMI filters quickly and easily from VPT.

The following EMI filters will now be on the Defense Supply Center Columbus (DSCC) Qualified Manufacturers List (QML):

VPT Product Name	DSCC Drawing Number
DVMA28/H	06004-01HXC
DVMH28/H	06005-01HXC
DVMH28F/H	06005-01HYC

"VPT is a strong supporter of the Standardized Drawing Programs of DSCC which is part of the Defense Logistics Agency of the United States," said Shawn Graham, Executive Director of Quality at VPT. "The release of these latest products adds to the range of current QML products we provide. Customers seeking to utilize power conversion products in critical reliability applications can now order these modules from VPT to minimize acquisition and logistics costs for their programs."

VPT also offers a variety of DC-DC converters qualified on DSCC Standard Microcircuit Drawings (SMDs). Interested customers can visit www.vpt-inc.com to access the full list of module and drawing numbers.

VPT will continue to expand its offering of products with Standard Microcircuit Drawings and DSCC Drawings in 2006 and beyond.

About VPT

VPT, Inc. leads the industry in providing innovative DC-DC converters, EMI filters, and custom engineering services for military, avionics, and space applications. Working in partnership with Delta Electronics, the world's largest commercial power supply manufacturer, VPT delivers its patented power solutions in a fast timeframe, with the highest certified quality, at a comfortable cost. Every day, organizations like NASA, Lockheed Martin, Boeing, Raytheon, the United States Air Force, and many more depend on quality solutions from VPT to power critical systems. Whether on the ground, in the air, or beyond, VPT provides the power driving critical missions today.
